Warehouse storage audit, Plant 3, April to June 2026

Audit of 6 and 7 July 2026 by the raw material team of CEAT.

> All four bays of the raw material warehouse are covered and ventilated, and every bale of natural rubber stood on a pallet. 1,180 of the 1,229 issue lines followed first in, first out. 11 of the 412 lots in store were past the time-to-use limit of their grade. All 11 got the storage ageing check before issue. 1 of them failed it and was downgraded.

What was checked and what was found

Area	What was checked	Finding
Warehouse storage	Cover, ventilation, pallets, distance from sun and heat	All four bays are covered and ventilated. Two pallet positions in bay 4 get direct sun from a roof light after 3 pm. Both positions are now blocked.
FIFO storage	The 1,229 issue lines of April to June against the receipt dates	1,180 issue lines followed first in, first out, which is 96%. The other 49 were issues from the front pallet of a double-deep row while an older lot stood behind it.
Time-to-use limit	The receipt date of all 412 lots against the limit of the grade	11 lots were past the limit. All 11 got the storage ageing check before issue. 10 passed. 1 failed and was downgraded.
Lot traceability	The lot card against the bay, and 40 mixing batches against their lots	Every lot card had the receipt date. 3 lot cards named a location that did not match the bay. All 40 mixing batches were traced back to their lot.
Contamination and moisture control	Wrapping, foreign matter and moisture at receipt	5 bales with torn wrapping were set aside and wrapped again. No wet bale was found.
Grades kept apart	Grades by bay and by row	No row with two grades was found.

Actions

Action	Owner	Due
Fit a shade under the roof light of bay 4 and keep the two pallet positions blocked until it is fitted	Warehouse lead	30 September 2026
Change the double-deep rows of bay 2 so that the older lot stands in front	Warehouse lead	31 August 2026
Correct the 3 lot cards and add a location check to the weekly stock count	Store supervisor	15 August 2026
Report every lot that passes its time-to-use limit to the store lead on the same day	Store supervisor	From 1 September 2026

Next audit

The next audit covers July to September 2026 and runs in the first week of October 2026. It counts the issue lines of bay 2 again after the rows are changed.

Synthetic sample written for the RPG NeuralMesh demonstration. It is not a record of CEAT.
